

# Your Screen Information Sheet

Provide as much information as possible

Customer Name: Jane Doe Date: 7 Dec 13

Film Type: MXH  
Use film description sheet on page 2 to help determine type

Email: jdoe@gmail.com Reference #: \_\_\_\_\_  
(in-house use)

Device Brand Name Modex

Model # SIN3J4

Device Type:

Tablet  Laptop  Monitor  All-In-One

TV Other \_\_\_\_\_

## SCREEN area to cover:

Overall Horizontal 130  
Millimeters is best or inches to the nearest 1/16"

Overall Vertical 202

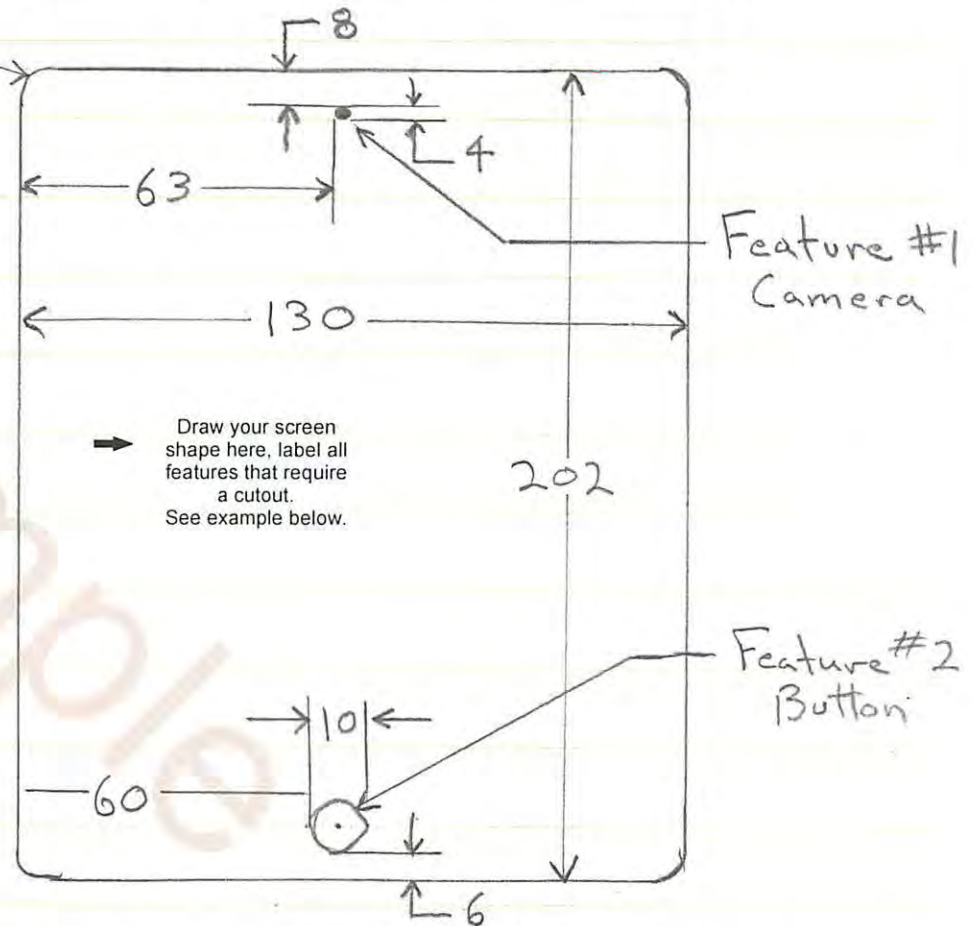

Note: For ease of application, overall film size is cut slightly smaller (.5mm -1mm). If you want exact, indicate below.

\_\_\_\_\_ Cut my film to EXACT measurements.

## Features to Cut may include:

Camera / Microphone / Sensors / Buttons / Speakers / etc:  
(Label as shown on example drawing below)

Radius 10mm  
4 Places

Page 2:  
Blank Form

Page 3:  
Film Description Sheet

### #1 Feature:

Centered:  Yes  No  
"A" 63  
"B" 8  
"C" 4  
"D" \_\_\_\_\_

### #2 Feature:

Centered:  Yes  No  
"A" 60  
"B" 6  
"C" 10  
"D" \_\_\_\_\_

### #3 Feature:

Centered: Yes  No   
"A" \_\_\_\_\_  
"B" \_\_\_\_\_  
"C" \_\_\_\_\_  
"D" \_\_\_\_\_

### #4 Feature:

Centered: Yes  No   
"A" \_\_\_\_\_  
"B" \_\_\_\_\_  
"C" \_\_\_\_\_  
"D" \_\_\_\_\_

Top Corner Radius 10

Bottom Corner Radius 10

### Radius Size Examples

Credit card corner = 3mm Pencil Top = 4mm  
US Dime = 9mm US Penny = 10mm  
US Nickel = 11mm US Quarter = 12mm

### Corner Radius Sizer in Millimeters

If using the radius sizer, print **without scaling**.  
You can check by measuring the Sizer.

**Photodon Corner Radius Checker:** We measure corner radius in millimeters to cut our screen protectors. To help determine corner radius of your screen, use **this** corner radius checker. To use properly, be sure to set your printer to **"Print to Scale"** or scale **"None"** and print **landscape**. Once printed, use a ruler and the "Scale Check" area to verify it was printed properly (one inch or one cm on your ruler should equal the scale check distance on paper). Now select corner radius curve nearest to your screen, then use scissors to cut out and verify the corner radius to your device screen.

**Scale Check**  
 1 inch =   
 1 cm = 

Example of Use

# Touché™ Brand Screen Protectors Film Comparison Sheet

## Features of all Photodon Screen Protectors:

- ▶ Touch-screen compatible,\* precision laser cut
- ▶ Silicone adhesion; no residue if removed
- ▶ **The lower the percentage of anti-glare, the clearer the image is with more surface reflection**
- ▶ High-quality, scratch-resistant materials
- ▶ Protects the device from harsh cleaning products
- ▶ **The higher the percentage of anti-glare, the more matte the protector is with less surface reflection**

Film Type	Glare Reduction	Image Quality Ease of Cleaning	Description
<b>Anti-Glare Screen Protectors</b>			
	25%		<b>MXH:</b> Light matte finish. Provides a paper-like feel on drawing tablets that is slightly more slippery than MXT with stylus use. Most popular for drawing tablets and in-dash screens. Some surface reflection in bright light. Low fingerprint retention. Max small dimension = 1250mm (49.2")
	50%		<b>MXT:</b> Medium matte finish. Provides a paper-like feel on drawing tablets with stylus use. Recommended for all devices. Popular anti-glare solution for industrial displays, televisions, churches, and outdoor displays. Low fingerprint retention. Max small dimension = 1035mm (40.7")
	85%		<b>MXG:</b> High matte finish. Highest glare reduction of all of our films. Best at minimizing overhead light reflection. Recommended for large displays such as televisions, kiosks, presentation displays. Works well on small devices as well. <b>Note:</b> High matte finish may cause gray-outs if viewed from the side. Low fingerprint retention. Max small dimension = 1000mm (39.3")
	85%		<b>5HS:</b> High matte finish. Provides extra protection against blunt force impact. Is 60% more scratch-resistant than standard screen protectors. Extra tough film with the advantages of anti-glare. Recommended for industrial use or field work where devices are at high risk of damage. Recommended for all devices. <b>Note:</b> High matte finish may cause grayouts if viewed from the side. Low fingerprint retention. Max small dimension = 1000mm (39.3")
<b>Clear Screen Protectors</b>			
	0%		<b>AMC Anti-Microbial:</b> Excellent image quality. Has an anti-microbial coating that guards the device's screen from bacterial growth. Kills 99+% of tested bacteria. Recommended for devices used in the medical field, as it also holds up well to harsh cleaning products. Great for all devices & is most beneficial for touchscreens. Works well with a stylus. <b>**Oleophobic coating. Note:</b> Polarized lenses can give the screen a slight blue tint. Low fingerprint retention. Max small dimension = 1040mm (40.9")
	0%		<b>MXO:</b> Excellent image quality. Has an <b>**oleophobic coating</b> . Recommended for all devices. Creates a slippery surface with stylus use. No anti-glare functions. Max small dimension = 1035mm (40.7")
	0%		<b>HSC Hard Shock-Absorbing Clear.</b> High optical clarity. Provides excellent impact protection with enhanced abrasion and scratch resistance. Recommended for industrial-type settings or environments where device screens are at high risk of damage. Contains anti-microbial properties and an <b>**oleophobic coating</b> . No anti-glare functions. Max size dimensions = 1000mm (39.3")
	0%		<b>9HO:</b> Excellent image quality. 9H surface hardness. Extreme abrasion resistance with smooth touch. Has an <b>**oleophobic coating</b> . Recommended for industrial settings or environments where the device is at higher risk of damage and for drawing tablets. No anti-glare functions. Max size dimension = 1000mm (39.3")
	0%		<b>MXB Blue Light Cut:</b> Good image quality. Cuts up to 93% of high-energy visible light on the violet/blue band from 400-450nm. Helps reduce eye strain and helps to improve sleep cycles. Recommended for anyone who has issues related to computer eye strain, macular degeneration, or sleep issues related to device screens. Has a noticeable blue tint when in sunlight. Not recommended for stylus use. No anti-glare functions. Max small dimension: 1000mm (39.3")

Works well with dry erase markers.

Laser pointers do not work reliably on any of our films.

\*The touch function on monitors with Infrared, "IntelliTouch", and "Surface Acoustic Wave (SAW)" technology DO NOT seem to work with silicone adhesion screen protectors. Our screen protectors work well on 98% of devices.

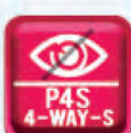

\*\*Oleophobic coatings allow for easier cleanup of fingerprints, oils, liquids, cosmetics, and other grime.

Additional products and information on backside

## Features of all Photodon Privacy Filters:

- ▶ Mini-louvers embedded in the material reduce side viewing at 30°, nearly black at 45°
- ▶ Clear image directly in front of the screen
- ▶ Silicone attachment will not cause damage to the screen
- ▶ 2-way and 4-way privacy filters available

Film Type	Glare Reduction	Image Quality Ease of Cleaning	Description
<b>Privacy Filters</b>			
	40%		<b>P2L 2-Way Privacy Filter:</b> Adheres with the help of clear double-sided tape. Provides privacy from two directions. Mini-louvers embedded in the filter reduces screen viewing at 30°, nearly black at 45°. Available for curved monitors. Small reduction of image quality, slight darkening effect. Easy to install. <b>Max Small Dimension = 735 mm (47.2")</b>
	40%		<b>P2S 2-Way Privacy Filter Silicone:</b> Adheres directly to the monitor with full silicone adhesive backing. Provides privacy from two directions. Mini-louvers embedded in the filter reduces screen viewing at 30°, nearly black at 45°. Recommended for all devices, especially tablets. Takes patience to install on larger devices. Small reduction of image quality, slight darkening effect. <b>Max Small Dimension = 723 mm (45.5")</b>
	40%		<b>P4S 4-Way Privacy Filter Silicone:</b> Provides privacy from 4 directions. Adheres directly to the monitor with full silicone adhesive backing. Mini-louvers embedded in the filter reduce screen viewing at 30°, nearly black at 45°. Recommended for all devices, especially tablets. Takes patience to install on larger devices. Small reduction of image quality, slight darkening effect. <b>Max Small Dimension = 466 mm (18.34")</b>

- We also offer microfiber cloths and screen cleaners to keep your devices looking clean and professional. We offer them separately or in a kit.
